The period between 2008 and 2013 will become crucial at changing the face to Czech towns and cities. The European Funds hold nearly 800 billion CZK reserved for urban regeneration, revitalisation, sustainable development, social living, and a modernisation of services and traffic in towns. Yet, in many ways, the local society still fails to understand the advantages of urban regeneration and lacks the key information to be able to answer the most important question - how to make our towns **the place to live**.
